MARTPOINT CREATOR NETWORK

Creator Challenge & Tracking Guide

How to join, create, submit, use your link and understand challenge performance.

This guide explains the normal challenge journey. Each challenge page remains the final source for its own dates, prizes, metrics and rules.

Joining a challenge enters you into the published process. It does not guarantee payment or a prize.

The challenge journey

Stage	What you do	What MartPoint does
1. Prepare	Complete the required Creator Centre lessons and review the brief.	Confirms the challenge is suitable for eligible Creator Network members.
2. Join	Read the terms, accept them and click Join challenge before the join window closes.	Records your participation and the rules version you accepted.
3. Create	Make original content that follows the brief and uses approved assets.	Provides the content requirements, examples and prohibited claims.
4. Submit	Publish publicly, then submit the public post URL before the deadline.	Reviews the submission and may approve, request correction or reject it.
5. Measure	Use the issued tracking link in an approved clickable placement.	Records traffic, enquiries and verified performance for the challenge.
6. Decide	Keep the post public and respond to reasonable evidence requests.	Uses the published award rules, human review and verified data.

Your tracking links

You do not create the link manually. Your creator account has a creator referral code, and an approved challenge submission can receive its own post-level token.

Link	Use	Example
Creator link	General creator-level traffic and referrals.	https://www.martpoint.com.ng/?ref=MP-00001
Submission link	A specific approved challenge post.	https://www.martpoint.com.ng/?ref=MP-00001&s=sub_...

When someone clicks, MartPoint can connect the visit to the creator. Later enquiry, demo, signup or customer events may be attributed within the published attribution window.

Where to place the link

- Profile bio or link-in-bio page.
- Story link or other platform-approved clickable placement.
- Pinned comment when the platform permits it.
- Another clear clickable destination allowed by the challenge brief.

A post's views and likes are separate from link conversion. Reach and engagement come from platform evidence; clicks, enquiries and demos come through attributed MartPoint activity.

Challenge awards

Awards are category-specific. A challenge may include performance, creative or overall awards. Read the exact expectation shown on the challenge page before you create.

Category lens	What it can focus on
Overall	A balanced result using the published judging and verified performance method.
Conversion	MartPoint-verified qualified enquiries, demos or other published outcomes - not raw clicks alone.
Reach	Verified views or reach within the published comparable measurement window.
Creative	Human judging of originality, clarity, accuracy and execution.
Rising	Progress against the published baseline or threshold for the challenge.

High views do not automatically mean a conversion win. Raw clicks or unqualified traffic do not automatically count as a qualified outcome.

Integrity and evidence

- Submit real, publicly viewable content and keep it available during the challenge period.
- Do not buy engagement, use self-referrals, submit duplicate posts or alter evidence.
- MartPoint may ask for platform analytics or other reasonable proof.
- Unusual activity is reviewed by the MartPoint team; an automated signal is not the final decision.
- Low conversion by itself is not proof of wrongdoing. It is simply a performance result unless other evidence says otherwise.

Submission checklist

- The post is public and the URL opens without a private login.
- The content follows the challenge brief and uses the required platform, hashtags, mentions and CTA.
- Any product screen or logo shown is from the approved Creator Kit.
- The wording does not promise profit, guaranteed sales, fake discounts or unsupported features.
- The submitted post was published within the challenge's allowed timing.
- The correct tracking link is used in the permitted clickable placement.

If your submission needs correction

Read the feedback carefully, update the content where possible and resubmit the public URL before the deadline. A submission being returned for correction does not mean the challenge entry is permanently lost, but the challenge rules and deadline still apply.

When rules change

Challenge rules are versioned. If a material change is made after you join, the portal will show the new version and ask you to review it. Your accepted version remains recorded for accountability.

> **Use the challenge page for the exact dates, award amounts, thresholds and required wording. This guide explains the process; it does not replace the challenge brief.**

Support

Use the Creator Portal notifications, FAQ or support area when you need help. If a product claim is unclear, ask before publishing rather than guessing.
